Dhaka, Bangladesh | +880 1839 277706 | [akash.akter08@gmail.com](mailto:akash.akter08@gmail.com) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

## Profile

Passionate full-stack developer proficient in React, Next.js, and Node.js, strongly emphasizing scalable, user-centric web apps. Thrive in collaborative teams, succeed in problem solving, and are committed to ongoing learning and innovation.

## Work Experience

### Jr. Web Developer

**BDcalling | Feb 2025 - Present**

- Created full-stack web applications with React.js, Next.js, Node.js, and Express, improving performance and SEO.
- Developed Shopify CMS solutions for e-commerce companies, including bespoke APIs and third-party plugins.
- Led client requirement analysis, translated business requirements into technology specifications, and produced iterative prototypes.

### Web Development Intern

**Code Studio | Jan 2023 – Mar 2023**

- Developed dynamic and completely responsive web applications with HTML5, CSS3, and vanilla JavaScript to ensure consistent user experiences across devices.
- Using MySQL, I created robust CRUD functionality and backend workflows, which improved data integrity and system stability.
- Using CSS Grid and Flexbox, I created mobile-first, cross-browser compatible layouts that improved performance and accessibility across all devices.

## Projects

### FITNESS EQUIPMENT E-COMMERCE | [LIVE SITE](#) – CLIENT - SERVER

- Created a feature-rich e-commerce website for workout equipment, including checkout alternatives like Stripe, a dynamic cart system, and product listings.
- An admin panel for adding, updating, and deleting products in real time was made, and the search function was improved with category and price filtering.
- Added debounced search for performance, updated responsive design for seamless use across devices, and added cart refresh warnings.
- Key Technologies: **React, Redux, TypeScript, Tailwind CSS, Express, Mongoose, Zod.**

### CAR BUZZ – USED VEHICLE MARKETPLACE | [LIVE SITE](#) – CLIENT - SERVER

- Created a full-stack platform with distinct dashboards for administrators, buyers, and sellers to purchase and sell used automobiles.
- Admins can manage users and listings, consumers can book automobiles, and sellers can add products.
- Stripe was used to handle payments, Google was used for secure user identification, and Tailwind CSS was used to improve the user interface for responsive design.
- Key Technologies: **React, Firebase, Tailwind CSS, Express, MongoDB, Stripe.**

## Skills & Abilities

- |                               |   |
|-------------------------------|---|
| • Front-end technologies      | • Next.js, React, React Native, Redux.  |
| • Backend and API integration | • REST, JSON, Express, Mongoose         |
| • Programming Languages       | • C/C++, JavaScript, TypeScript, Python |

## Education

B.SC. IN COMPUTER SCIENCE & ENGINEERING | JANUARY 2024 | PUNDRA UNIVERSITY OF SCIENCE & TECHNOLOGY, BOGURA.
